

## ICE HOUSE

### COOL BUSINESS. COOL OPPORTUNITY.

The Ice House is our premier ice and water vending machine, offering the highest capacity production and storage of any of our three models. It is the nation's leading ice and water vending destination, and features five patented technologies and a filtration process that makes the freshest and most hygienic ice and water product available. About the size of two parking spaces, the Ice House is the high capacity, high volume solution for your high traffic volume locations, such as retail business centers, home improvement locations, recreational centers and convenience store locations. It will not only put under-utilized parking lot space to work, it will draw customers in to the businesses around it.

## Our Story

Ice House America pioneered the ice vending category when it sold its first stand-alone ice vending machine in 2003. Since that time, we have been revolutionizing the way people think about bulk ice and water through innovative ice-making and delivery technologies and brand marketing. Twice the Ice is our independent owner brand — and the leading destination for convenient, on-demand, fresh ice and water.

## High Capacity Destination

The Ice House is our original ice vending unit and the hottest destination in ice vending. With a footprint about the size of two parking spaces, the Ice House has a 6,500 lb. bin capacity and is regarded as best in class. This model is best suited for busy commercial business centers and locations with high traffic volume. Not only will it put under-utilized real estate to work earning income, it will draw customers to existing businesses nearby. All Ice House units are installed with the SmartIce™ Remote Management System.

## Eco-Responsibility

Twice the Ice ice and water is produced fresh and on-demand using municipal-supplied water that flows through our filtration and sterilization process ensuring that customers enjoy clean, fresh ice and water with every purchase. Our ice and water vending machines have become the sustainable alternative to traditional ice manufacturing because typical ice-making creates supply chain waste, especially carbon emissions generated by distant manufacturing sites and delivery fleets burning fossil fuels. Moreover, as the convenient ice source serving the bulk ice requirements of scores of nearby businesses, Twice the Ice cuts down the need for cold storage and costly, inefficient in-house icemakers.

## Technological Leadership

We've invested time and resources into making certain that Twice the Ice ice and water vending machines maintain their lead in durability, product quality and convenience. But, we did not stop there: everyday we seek new and better innovations that can improve mechanical performance, durability and the quality of our product — bulk ice/water. Don't just take our word. Come visit our ice vending machine manufacturing facility and see for yourself. See why our ice vending machines are the industry standard.

## SmartIce™ Remote Management System

SmartIce™ Remote Management System, a web-based application, lets you manage all aspects of your Twice the Ice vending machine — including location information, product sales, technical operations, and customer service. It offers real-time access to operational status and current sales data. It lets you measure sales trends, benchmark locations and evaluate machine

performance. Most important, all SmartIce™ information is housed on our secure servers and backed up daily.

## Key Characteristics

- Designed for high traffic sites.
- The largest ice and water vending machine available.
- Bagged or direct-to-cooler options.
- Open 24/7.
- Minimal maintenance required.
- SmartIce™ Remote Management System capability.
- Payment options: cash, credit/debit, vend coupons and tokens.
- Can accommodate as much as 50,000 customer visits annually.

## Technical Specifications

- Dimensions: 8' 4" W x 24' D x 15' H (2 parking spaces)
- Products
  - Bulk ice.
  - Bagged ice: 10 lb., 16 lb. and 20 lb. options.
  - Filtered water: 1, 3 and 5 gallon options.
- Ice storage bin: 6,500 lbs.
- Ice production capability: 4,500 - 13,000 lbs. in 24 hours
- System allows retail price to be set in increments of \$0.05.

## 5200SM Ice Maker

- Power Requirement: 85A @ 208-240/60/3 (138A w/ 2nd ice maker)
- Power Consumption: 216 KWH per 4,500 lbs.
- Water Consumption: 542 Gal. per 4,500 lbs.
- Ice Production: 280-16 lb. bags (560 w/2nd ice maker)

## 1000SM Ice Maker

- Power Requirement: 98A @ 208-240/60/3 (165A w/ 2nd ice maker)
- Power Consumption: 300 KWH per 6,500 lbs.
- Water Consumption: 783 Gal. per 6,500 lbs.
- Ice Production: 400-16 lb. bags (800 w/2nd ice maker)

## Warranty

The Ice House has a one-year full coverage warranty plus each major component has its own warranty policy. Ice House America believes our superior engineering and construction will allow our machines to last almost 30 years, with major components lasting around 15 years.
